

# Lockout/Tagout Procedure Development

- Protect workers from energy sources or unexpected motion
- Tailored procedures for your specific equipment
- Ensure compliance with OSHA's 29 CFR 1910.147 Standard

Lockout/Tagout procedures are a standard that OSHA mandates for safeguarding employees working on electrical circuits and equipment. Our robust program prioritizes employee safety and minimizes the risks associated with hazardous energy exposure. We'll guide you through the process seamlessly so you can feel confident in your team's safety.
